

**GETON CONTAINERS**

# **100 series BMS battery management system**

## Overview

---

What is a bms-100 battery management system?

Electrical systems are complex and critical to heavy-duty vehicle performance. The BMS-100 Battery Management System enables continuous electrical system monitoring of a heavy-duty vehicle's entire battery and electrical system while in operation. Ideal for managing no-idle loads, the BMS-100 system offers::

What is battery management system (BMS)?

Battery Management System (BMS) is the “intelligent manager” of modern battery packs, widely used in fields such as electric vehicles, energy storage stations, and consumer electronics.

What is a BMS used for?

A Battery Management System (BMS) is widely used in various applications such as electric vehicles (EVs), energy storage systems (ESS), uninterruptible power supplies (UPS), and industrial battery applications.

How many batteries can be connected to a BMS?

The maximum number of batteries that can be connected to the BMS is 20. The SmallBMS, VE.Bus BMS V2 and the Lynx Smart BMS can connect to a 12, 24 or 48 V system. The other BMS models can only connect to a 12 V system. The SmallBMS and VE.Bus BMS V2 require that all loads and charge sources are directly connected to the battery.
