

18350 Battery pack

Overview

What is a 18350 battery?

A 18350 battery is a high-drain, rechargeable lithium-ion cell designed for compact, power-intensive applications. With standard dimensions of 18mm x 35mm, it offers a smaller footprint compared to 18650 batteries while maintaining a high energy density and reliable discharge performance.

What is a high-drain 18350 cell?

Discharge Rate (CDR): Some high-drain 18350 cells offer continuous discharge rates of 5A – 15A, making them ideal for power-hungry devices. Cycle Life: Can exceed 500 to 1000 charge cycles, depending on proper maintenance and chemistry type.

What is the difference between 18650 and 18mm x 35mm batteries?

With standard dimensions of 18mm x 35mm, it offers a smaller footprint compared to 18650 batteries while maintaining a high energy density and reliable discharge performance. These cells are widely used in tactical flashlights, medical instruments, compact vaping devices, and industrial electronics.
