

## **2 large energy storage projects worth 3.3 billion yuan launched**

## Overview

---

What are the energy storage projects in North China?

Energy storage projects in North China are currently the most in China. Due to the geographical environment, the power grid in Northwest China cannot supply power to all regions. Provide electricity to the people of the region through off-grid distributed generation and energy storage systems.

How is energy storage developing in China?

However, China's energy storage is developing rapidly. The government requires that some new units must be equipped with energy storage systems. The concept of shared energy storage has been applied in China, which effectively promotes the development of energy storage. 4.3. Explore new models of energy storage development.

Is energy storage in China's 5 year plan?

In 2016, energy storage was included in China's 13th Five-Year Plan national strategy top 100 projects. Energy storage has officially entered the national development plan for the first time and has been identified in the 100 major engineering projects which China plans to implement in the next five years .

How can energy storage be profitable in China?

Actively support the diversified development of user-side energy storage. Encourage user-side energy storage such as electric vehicles and uninterruptible power supplies to participate in system peak and frequency regulation. Explore new energy storage models and new formats . Energy storage can be profitable with policy subsidies in China.

## 2 large energy storage projects worth 3.3 billion yuan launched

### Expanded production three times in four months, and Penghui Energy

Among them, the investment in energy storage cells and system integration projects is 1.8 billion yuan. According to statistics from InfoLink Consulting, a new energy ...
