

2000w off-solar container grid inverter with components

Overview

What is an off-grid solar power inverter?

An off-grid solar power inverter, also known as a stand-alone inverter or solar battery inverter, is a device used in an off-grid solar system. It operates independently of the power grid and can't feed electricity to the grid. It has no provision to tap into the grid electricity.

What is on grid solar inverter?

On grid solar inverters are used in on grid solar systems used for home, business, institutions and industries. The main part of solar system is solar inverter as it converts sunlight into useful energy. On solar inverter price for MPPT based technology with inbuilt remote or web monitoring.

What is a 2000W inverter?

Low cost 2000W (3000VA) pure sine wave power inverter with battery charging, LCD display, 21-30V (24V) DC/ 42-60V (48V) DC wide range input, transforms DC voltage to 110V/ 120V/ 220V/ 230V/ 240V AC output voltage.

What is a 24 volt/ 48 volt off grid solar inverter?

24 volt/ 48 volt off grid solar inverter/ inverter charger is 2000 watt (3000VA) power, pure sine wave output, available for sensitive load. It is designed with AC priority by default, when AC input is present, the battery will be charged first, and the inverter will transfer the input AC to power the load.

2000w off-solar container grid inverter with components

Intech Energy Container

The Intech Energy Container -- or ECON -- is a modular, pre-configured off-grid power solution. It combines solar PV, battery storage, inverters, and energy management in a rugged container.
