

# 2mwh energy storage project

## Overview

---

What is a 1MWh energy storage system?

The 1MWh Energy Storage System consists of a Battery Pack, a Battery Management System (BMS), and an AC Power Conversion System (PCS). We can tailor-make a peak shaving system in any Kilowatt range above 250 kW per module. For applications over 1MW these units can be paralleled.  
Features: Features of the Battery Management System (BMS):.

What is a polinovel 2mwh commercial energy storage system?

Max. Efficiency Get your Exclusive Offer! Polinovel 2MWH commercial energy storage system (ESS) is tailored for high-capacity power storage, ideal for large-scale renewable energy generation, PV self-consumption, off-grid applications, peak shaving, and emergency backup power.

How does a power storage system work?

They integrate lithium batteries, PCS, transformer, air conditioning system, and fire protection system within a single container, offering a comprehensive plug-and-play solution for large-scale power storage needs.
