

**GETON CONTAINERS**

# **5MW Solar Containerized Container for Agricultural Irrigation in Reykjavik**

## Overview

---

Are solar-powered irrigation systems sustainable?

Solar-powered irrigation systems (SPIS) are a clean technology option for irrigation, allowing the use of solar energy for water pumping, replacing fossil fuels as energy source, and reducing greenhouse gas (GHG) emissions from irrigated agriculture. The sustainability of SPIS greatly depends on.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.

Where are solar power plants made?

Headquartered in Shanghai with 50,000+ production bases across Jiangsu, Zhejiang, and Guangzhou, the company employs 1,000+ professionals, including 20+ engineers driving energy storage technology. ISO/TUV/CE-certified units deliver rapid-deploy solar power for off-grid, emergency, and mobile applications, reducing emissions by 70% vs diesel.

Does solar-powered drip irrigation improve security in the Sudano-Sahel?

Solar-powered drip irrigation performs well. Irrigation Science, online DOI: 10.1007/s00271-014-0438-0. Burney J, Woltering L, Burk M, Naylor R, Pasternak D. 2009. Solar-powered drip irrigation enhances food security in the Sudano-Sahel. Proceedings of the National Academy of Sciences of the United States of America, 107(5), 1848-1853.

## 5MW Solar Containerized Container for Agricultural Irrigation in Rey...

### The Advantages and Applications of Solar Power Containers

Solar containers meet these needs while minimizing logistical burdens. Agricultural and Water Supply Systems They can power irrigation pumps, cold storage units, and water ...
