How much does 850w a day cost?

Assuming 850W and 24 hours that works out to about 20.4 kWh. Multiple that by your electricity rate which is normally in kWh. My area it's .09 per kWh. So that works out to about \$1.80 a day. Obviously your PC isn't consuming 850W all the time. So this is worse case scenario. \$.25 per kWh in Europe. nice, isn't it?

:).

Where can I buy a reliable inverter battery?

Buy latest range of reliable inverters, batteries, solar panel and lithium ion inverter battery at Luminous. Get best deals on power solution and solar products.
