

# Arc flash switchgear in China in Lithuania

## Overview

---

What arc flash mitigation solutions are available?

Improve safety with our extensive portfolio of arc flash mitigation solutions including arc quenching and arc-resistant switchgear, Power Xpert XGIS switchgear, Power Xpert Dashboard, Power Defense molded case circuit breaker, Insulgard, arc flash relays and more.

What is arc quenching Magnum DS switchgear?

The arc quenching Magnum DS switchgear detects and extinguishes an arc flash in less than 4 ms to dramatically reduce incident energy. It reacts 10x faster than systems that rely solely on circuit breakers to clear an arc fault, including maintenance switches, ZSI, bus differential relaying and arc detection relays.

How do I reduce arc flash hazard?

Changing the system operating configuration (switching to an alternate feeder or engaging maintenance mode settings) may reduce the arc flash hazard. Enables personnel to stand outside the arc-flash protection boundary when inserting or removing (racking) power breakers or MCC units from low- or medium-voltage equipment.

How can arc-flash safety be improved?

Improve safety and reduce arc-flash hazards, including dedicated wireway and safety barriers isolating personnel from line and load. Drastically reduce the available arc-fault current. Lower arc-flash energy in a system generally translates into improved personnel safety.

## Arc flash switchgear in China in Lithuania

---

### [Custom design & supply of arc flash rated ...](#)

Custom design & fabrication of arc flash rated electrical switchgear in China; technical support from your initial design of your power distribution system;
