

# **Are there any 5G base stations in Northern Europe**

## Overview

---

### What is the European 5G Observatory?

The European 5G Observatory tracks progress in 5G infrastructure deployment across the EU and other regions worldwide according to base stations deployment, edge nodes and infrastructure sharing agreements. Source: IDATE estimates and regulators' data. Reporting period: at December 2024. Source: IDATE estimates and regulators' data.

### Is 5G available in Europe?

By contrast, 5G Availability in Central and Western European laggards such as Belgium, the United Kingdom, and Hungary remains less than half that of the leaders. On average, EU mobile subscribers spent 44.5% of their time connected to 5G networks in Q2 2025, up from 32.8% a year earlier.

### Is 5G sluggish in Europe?

The deployment and adoption of 5G SA in Europe remain sluggish, increasing slowly from a very low base and further widening the region's gap with North America and Asia. Spain stands out as a clear leader in 5G SA deployment, reaching an 8% Speedtest® sample share compared with the EU average of just 1.3% as of Q2 2025.

### Which countries have the best 5G coverage?

The report also presents a tool for scoring network coverage and speeds, highlighting countries such as Italy, the Netherlands, and Denmark with almost 100% coverage. Portugal has already reached 75% of total 5G coverage (7,723,689 inhabitants), well ahead of Spain (58.9%) and even France (74.4%) .
