

Automatic Ordering System for Folding Containers Used at Airports

Overview

Which airports use automatic baggage loading system?

Highlights: The world's first automatic baggage loading system now used by major airports – Amsterdam Schiphol, Frankfurt Fraport and London Heathrow. Fully automatic loading, with a cycle time of 15 seconds per bag. Supports most popular ULD (unit load device) types and can be configured for new ULD types.

How does automated baggage handling work?

With automated baggage handling systems, such as check-in, belt, sorting, and baggage claim equipment, as well as state-of-the-art software, you can efficiently control baggage flow and gain satisfied passengers.

What are Air Cargo Systems?

AIR CARGO Systems and individual components for cost-efficient transportation, storage and build & break of unit load devices and consignments. ULD HANDLING Autonomous and intelligent transportation of ULDs with automated guided vehicles. Intelligent solutions for efficient baggage sorting and process-reliable loading of baggage in ULDs.

What is automated container unloading?

Our Automated Container Unloading system streamlines the baggage unloading process and minimises the need for operator intervention while maximising productivity. By leveraging automation technology and innovative design, our Automated ULD Container Unloader ensures that bags are efficiently removed from ULDs with precision and speed.
