Barbados Telecommunications Base Station Company

Overview

What telecommunications services are available in Barbados?

The telecommunications market in Barbados is quite competitive. The leading service providers of Flow Barbados (previously known as Cable and Wireless or Lime) and Digicel Barbados offer various cell phone deals with different billing options. They both operate on a GSM network and offer international roaming options.

When did telecommunications start in Barbados?

In 1942, the international telegraph service relied mainly on submarine cables for its operation. However, in 1943, there was the installation of the wireless stations at Boarded Hall and Carrington when Barbados became a major player in global telecommunications.

Is Digicel aligned with Barbados' national digital and sustainability goals?

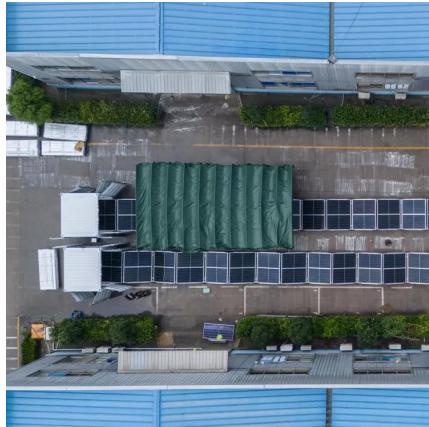

Science and technology minister Senator Jonathan Reid commended Digicel for aligning its operations with Barbados' national digital and sustainability goals.

What does Digicel's 5G+ network mean for Barbadians?

Abrahams also announced the launch of Digicel's 5G+ network, promising "lightning-fast speeds, ultra-low latency and the ability to connect more devices than ever before." She said the new network would allow Barbadians — from small business owners to students and developers — to take full advantage of next-generation digital services.
