# Base station communication FSU wireless module

## Overview

---

What is a base station monitoring system based on?

Research on Wireless Communication Base Station Monitoring System Based on Artificial Intelligence and Network Security 2.1 Research on Key Technologies of Wireless Communication The communication of network is the fundamental of wireless communication .

Why do we need a wireless communication base station monitoring system?

In view of the improvement and challenges of wireless communication technology, it is necessary to establish an efficient and stable wireless communication base station monitoring system to solve the serious drawbacks of "monitoring without control and low reliability" in the traditional staffed computer room for monitoring.

How supervised machine learning is used in wireless communication base station monitoring?

In the experiment, using the supervised machine learning algorithm, the program of the wireless communication base station monitoring system is designed by setting the working frequency of the GSM-based wireless communication system to the wireless communication base station monitoring system.

How do I test the connection to the base station equipment?

Test method for connecting to the base station equipment: enter the IP address and port information of the base station to be tested, and click the "Connect" button to test whether the connection is successful.
