# **Batteries and inverters for power outages at home**

## Overview

---

Can a battery inverter protect your home from a blackout?

Whether caused by storms, wildfires, or grid failures, blackouts can leave homes vulnerable, especially those relying on electricity for heating, refrigeration, or medical equipment. That's where home battery inverters step in as silent heroes, offering reliable backup power when the grid goes dark.

Can an inverter and a battery save the day?

An inverter and battery can save the day! An inverter changes DC power from batteries to AC power, which your home uses. This set-up provides backup energy, keeping your lights on and appliances running. Using these two together, you can enjoy peace of mind. Did you know that some systems can even charge during the day using solar energy?

What can a power inverter do during a blackout?

During a blackout, the inverter seamlessly takes over, supplying energy to essential loads such as: Lighting Refrigeration Medical equipment Wi-Fi and communication devices EV charging (in some systems) Some advanced systems can even power an entire home, depending on the inverter capacity and battery size.

Why do you need a 12V inverter battery?

The battery powers your devices during outages, making it essential for reliable performance and safety over time. Amaron inverter batteries are built for durability. Known for their strength, these batteries combine advanced technology and long-lasting performance. Need a 12V inverter battery or something with extra power?
