

Battery cabinet integration system in Latvia

Overview

Where is the first battery energy storage system in Latvia?

On November 1 Latvia's largest wind energy producer Utilitas Wind opened the first utility-scale battery energy storage battery system in Latvia with a total power of 10 MW and capacity of 20 MWh in Targale, Ventspils region.

Why are batteries being installed in Latvia?

Operating synchronously with continental Europe, one of the most important functions is ensuring frequency regulation and balancing reserves. In order to ensure the required frequency regulation, batteries are being installed in Latvia.

Why is the Baltic electricity synchronisation event important?

This event is also particularly important in the context of the Baltic States' ambitious project to synchronise the Baltic electricity system with the European grid, which is being implemented to decouple the Latvian, Lithuanian and Estonian electricity systems from Russia and Belarus.

Will the Baltic states be connected to the European Grid on 9 February 2025?

The project foresees that the Baltic States will be connected to the European grid on 9 February 2025, thereby reducing security of supply risks and levelling electricity prices in the economic point of view, from the point of view of achieving "green goals", and from the security point of view.
