# **Battery cabinet separation at Lithuania communication site**

## Overview

---

What is happening with Lithuania's battery energy storage system?

An international tender for the design, manufacture, installation, and technical maintenance services for Lithuania's battery energy storage system has been announced. Energy Cells signed a contract with the winning consortium of Siemens Energy and Fluence. The start of the energy storage facilities system construction.

Which energy storage facilities will provide Lithuania with instantaneous electricity reserve?

The Government of the Republic of Lithuania has appointed Energy Cells as the operator of storage facilities that will provide Lithuania with an instantaneous electricity reserve. The start of the design works for the energy storage facilities system. The start of the testing works of the energy storage facilities system.

What is Lithuania's electricity storage project?

The electricity storage project will guarantee security and stability of energy supply in Lithuania. It will also enable Lithuania to disconnect from the Russian controlled electricity grid and synchronize with the continental European electricity grid.

Why should Lithuania invest in batteries?

It will also enable Lithuania to disconnect from the Russian controlled electricity grid and synchronize with the continental European electricity grid. In case of accidents, batteries will provide instantaneous electricity reserve service in less than one second. In the future, batteries will help to integrate renewable energy sources.
