Come and experience the latest technology & research, how we build power and move the world with our attitude to change. We are aiming for success just like you. Your success defines our own success.

Why is the switchgear industry growing?

The main driver of the switchgear industry's growth is the increase in investments in T&D infrastructure. An electrical component known as switchgear is made up of circuit breakers, fuses, and electrical disconnect switches. Switchgears are used in an electric power system to safeguard, control, and monitor electrical equipment.

What are the different types of switchgear?

There are two main types of switchgear: enclosed and open. The enclosed type is designed with safety as the priority, whereas the open type is valued for its ease of maintenance. Switchgear plays a vital role in a wide range of applications such as power plants, substations, factories, and buildings.
