What are the different types of Inverter air conditioners?

The most common type of inverter air conditioner is the split unit or sometimes known as the mini split. Apart from that, western countries have inverter window air conditioners. Furthermore, they also have inverter centralized split air conditioners or better known as variable-speed air conditioners.

Is an air conditioner an inverter?

The word “inverter” refers to the compressor of the air conditioner. As long as the compressor of the air conditioner can regulate its speed and hence, its capacity, the air conditioner is considered as an inverter air conditioner. However, some air conditioners are “partially inverter”.
