

# **Bogota Energy Storage BESS Price**

## Overview

---

How much does a battery energy storage system cost?

When evaluating battery energy storage system (BESS) prices per MWh, think of it like buying a high-performance electric vehicle – the battery pack is just the starting point. Industry data reveals current BESS project costs range between \$280,000 to \$480,000 per MWh installed, depending on configuration and ancillary components.

How much does a Bess system cost?

As of most recent estimates, the cost of a BESS by MW is between \$200,000 and \$450,000, varying by location, system size, and market conditions. This translates to around \$200 - \$450 per kWh, though in some markets, prices have dropped as low as \$150 per kWh. Key Factors Influencing BESS Prices.

How much does Bess cost in China?

It is nonetheless still eye-opening to note just how big those differences in cost are. The average for a turnkey system in China including 1-hour, 2-hour and 4-hour duration BESS was just US\$101/kWh. In the US, the average was US\$236/kWh and in Europe US\$275/kWh, more than double China's average cost.
