# Bolivia energy storage lithium iron phosphate battery

## Overview

---

Where is the largest lithium-ion battery storage system in Bolivia?

The site in the municipality of Baures, Bolivia. Image: Cegasa. The largest lithium-ion battery storage system in Bolivia is nearing completion at a co-located solar PV site, with project partners including Jinko, SMA and battery storage provider Cegasa.

Is there a lithium trove in Bolivia?

Our Standards: The Thomson Reuters Trust Principles. On Bolivia's Salar de Uyuni, a vast white salt flat that feels almost otherworldly, Karina Quispe is watching from the sidelines a global resource race for the world's largest - and almost untapped - trove of battery metal lithium.

Are lithium ion phosphate batteries the future of energy storage?

Amid global carbon neutrality goals, energy storage has become pivotal for the renewable energy transition. Lithium Iron Phosphate (LiFePO<sub>4</sub>, LFP) batteries, with their triple advantages of enhanced safety, extended cycle life, and lower costs, are displacing traditional ternary lithium batteries as the preferred choice for energy storage.

Are LFP batteries the future of energy storage?

LFP batteries are evolving from an alternative solution to the dominant force in energy storage. With advancing technology and economies of scale, costs could drop below ¥0.3/Wh (\$0.04/Wh) by 2030, propelling global installations beyond 2,000GWh.
