

GETON CONTAINERS

Botswana EK kilowatt-hour solar container outdoor power

Overview

How much electricity does Botswana use a year?

Botswana currently consumes approximately 4,800 gigawatt-hours (GWh) of electricity per year, with a peak demand of 680 megawatts (MW) and a base load of 400 MW. Demand is projected to rise by five percent annually, reaching 7,000 GWh by 2040.

How much shareholding does Botswana need to invest in solar?

“Utility-scale projects by foreign private sector entities require at least 40% mandatory shareholding by Botswana citizen-owned companies. However, small-scale solar PV investments are reserved for 100% citizen-owned companies,” Kenewendo added.

How will Botswana Power Projects be implemented?

These projects, with a combined capacity of 1.5GW, will be implemented through private sector investment, with the Botswana Power Corporation (BPC) acting as the offtaker under long-term Power Purchase Agreements (PPAs) of up to 25 years.

How many solar projects are planned in Maun & Letlhakane?

Initially, two large-scale projects were planned; a 200MW concentrated solar power plant in Maun and a 100MW solar photovoltaic (PV) project in Letlhakane. Instead, the government has opted for Maun Solar PV (500MW), Letlhakane Solar PV (400MW), Isang Solar PV (400MW), and Mmadinare Solar Project (100MW).
