Can the outdoor inverter be turned off

Overview

What happens if the inverter goes out?

The power goes out and your appliances cease to run. You can always turn the inverter back on but that can take time. And most appliances do not like being turned on and off. By leaving the inverter on, the system can automatically switch to it when shore power ceases.

Should I Turn Off my inverter if I have another power source?

Anytime you have another power source available – direct AC, generator, shore power etc. – you have the option to turn off the inverter. The benefit of leaving it on however, is the system automatically switches to it when the other power source is no longer available. In the end it is your call.

How do I Turn Off the inverter?

First: Switch off the inverter from the front side button, press and hold it until the inverter is switched off. Second: Switch off the power socket, power the inverter from the grid, and then unplug the input power plug of the inverter from your home power socket.

When should you turn off your inverter?

Vacation or Long Absences: If you're going away for an extended period, turning off the inverter can help save energy and prevent any issues. **Power Outages or Emergencies:** In case of a power outage or other emergencies, you might need to turn off the inverter to protect your system.
