

China Southern Power Grid Energy Storage Field Planning

Overview

Does China have a power grid?

Expand power generation capacity and enhance grid infrastructure across its vast and geographically diverse territory. Although coal remains the dominant energy source, China has made significant progress in developing renewable energy, including wind, solar, nuclear, and hydropower, as part of a broader strategy.

Will China develop new energy storage systems between 2025 and 2027?

BEIJING, Sept. 12 -- China on Friday unveiled an action plan to promote the development of new forms of energy storage between 2025 and 2027, amid efforts to support green energy transition and ensure the stability of new-type power systems.

Which SOE restructured the electricity grid?

The electricity grid was restructured into two SOEs: The State Grid Corporation and The China Southern Power Grid. State Grid Corporation accounts for 80% of electricity transmission, while China Southern Power Grid accounts for the southern half of China (Sandalow et al).

What is China's energy storage policy & regulatory roadmap?

The policy and regulatory roadmap is aimed at pushing China's installed base of large-scale energy storage – primarily lithium-ion battery energy storage systems (BESS) – to 180GW by the end of 2027.
