# **Colombia Green Energy Storage Project Construction Plan**

## Overview

---

How many MW are installed in Colombia in 2023?

established. From January 2023 to April 2024, 1,585.29 MW have been installed, accounting for 27.7% of the goal (UPME). However, despite progress, the most critical uncertainty identified unanimously by leaders in the Colombian energy sector is a.

What is a ceptability in the Colombian energy sector?

goal (UPME). However, despite progress, the most critical uncertainty identified unanimously by leaders in the Colombian energy sector is a ceptability. This reflects concerns over delays and permitting issues, including connection point delays, delays in prior consultation, and the absence of regulatory response times or compliance with.

Could Panding grid availability help Colombia achieve its transition goals?

panding grid availability could put Colombia on the fast track to achieving its transition goals. For instance, the La Guajira region, which holds the greatest potential for generating RE due to high levels of solar radiation and strong winds from the nor.

How much energy does Colombia use?

businesses.<sup>4</sup>In 2021, Colombia's total final energy consumption reached 1,319 petajoules (PJ). Fossil fuels accounted for 67% of this total, with oil being the primary energy source (49%), followed by natural gas (11%) and coal (7.1%).<sup>5</sup> Electricity, primarily sourced from hydropower, constituted the second-highest consumed en

## Colombia Green Energy Storage Project Construction Plan
