

GETON CONTAINERS

Comparison of prices for folding container DC power supplies used in schools

Overview

How many power supplies can be mounted in a 40ft container?

Power supplies <300kW can be mounted in only a single 40ft container, while greater powers can be achieved in multiple containers and connected upon delivery. Depending upon specifications, containerized power supplies may be stacked, or located side-by-side. Setup and testing or shut-down and packing can be achieved within a matter of days.

Why should you choose AMPEGON for a self-contained power supply system?

To address these challenges, Ampegon has developed solutions to provide flexible self-contained power supply systems. Whether there is insufficient space inside existing buildings for a new power supply, no building exists, or there's a need for a system to be continuously mobile, Ampegon has experience providing such solutions.

What types of power supplies can be provided?

A wide range of high voltage, CW DC, pulsed or modulated waveform outputs can be provided. The entire system is made to be entirely weatherproof. Power supplies <300kW can be mounted in only a single 40ft container, while greater powers can be achieved in multiple containers and connected upon delivery.
