

# Copenhagen s latest policy on new energy storage

## Overview

---

Does European energy have a battery storage project in Denmark?

European Energy breaks ground on battery storage in Denmark together with Kragerup Estate. Project to provide operational experience for European Energy in integration of battery solutions. Copenhagen, Denmark, 20th of January 2025 - European Energy has started on its first large-scale battery storage project.

What is European energy's new battery storage project?

This is done in collaboration with Kragerup Estate. This is the first battery storage project that European Energy has undertaken in Denmark, and it will provide valuable operational experience in integrating battery solutions with the grid for the company.

When will Copenhagen Energy be commissioned?

With construction works scheduled to begin late this year, the facilities are expected to be commissioned in the first half of 2026. Copenhagen Energy has been developing the projects since the start of 2024.

How will a battery help balance the power grid in Denmark?

In addition, the battery will offer crucial system services to help balance the power grid in eastern Denmark. It will store surplus renewable energy during periods of high production and supply it back to the grid when demand is high, improving overall energy efficiency.
