

**GETON CONTAINERS**

# **Corrosion-resistant solar-powered containers for port use**

## Overview

---

Why do you need a solar container unit?

Our solar containers ensure fast deployment, scalability, customization, cost savings, reliability, and sustainability for efficient energy anywhere. With our pre-configured solar container unit, you can get going quickly, and the folding solar panels for containers can be deployed in less than three hours.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.

Is solar a viable option for shipboard power systems?

(Tick all that apply) Despite being a hard-to-abate industry, shipping is witnessing an acceleration in the adoption of clean technologies. Solar is emerging as a particularly attractive option for integration into shipboard power systems due to its abundance, reliability and zero-emission profile.

Are solar panels suitable for marine applications?

While initially considered difficult to adapt to marine environments, continuous advancements in materials science and engineering are yielding more robust, efficient and cost-effective solar technologies specifically designed for maritime applications.

## Corrosion-resistant solar-powered containers for port use

### [Solar technology: powering the future of shipping](#)

For example, breakthroughs in photovoltaics have seen the development of lightweight, flexible, and corrosion-resistant solar panels, which have improved the feasibility of ...
