

Cost of a 20kW Foldable Container for Australian Farms

Overview

How much does a 20kW Solar System cost in Australia?

Across Australia, a quality 20 kW array installed on a standard iron or tiled roof with no major upgrades falls between \$15 000 and \$22 000, including GST and the federal STC incentive. That headline range converts to roughly \$750 - \$1 100 per installed kilowatt. How many panels are in a 20kw solar system?

How much area is required?

.

How long does it take to ship a solar container?

Standard solar container models can be manufactured and ready to ship in as little as 4-6 weeks. Customized configurations can take up to 8-10 weeks, with shipping times varying by destination. Do you offer after-sales support for mobile solar PV containers?

.

How much does it cost to add batteries to a 20kW system?

Adding batteries to a 20kW system significantly adds to the cost. Battery prices for a large system like this typically hover around \$1,200 per kWh of storage capacity. If you were to add two 10 kWh batteries, expect to add an extra \$24,000 to the cost of the system. Adding four 10 kWh batteries would add roughly \$48,000 to the system cost.

What is a solar panels on shipping container?

It not only transports the PV equipment, but can also be deployed on site. It is based on a 10 - 40 foot shipping container. Efficient hydraulics help get the solar panels ready quickly. Due to its construction, our solar panels on shipping container offers unmatched flexibility and maneuverability.
