

Delivery time of 200kWh folding container for steel mill

Overview

Can a steel floor container take a higher selective load?

Steel floor container can take higher selective loads. If cargo exceeds these limits, a longer bedding is required or the cargo is to be loaded on flatracks. The TT Club and CINS established a Steel Coil Guide Line. The main shipping lines are member of the CINS (Cargo Incident Notification System).

What is in-Mill logistics?

The key to optimally functioning in-mill logistics is an intelligent, well-engineered mill layout where the storage forms an integral part of the production process and ensures fast and flexible material flow throughout the mill.

How much load can a Hapag-Lloyd container take?

All Hapag-Lloyd standard containers (gp,ot,ht) can be stressed with 3t per running meter for 40'container and 4,8t per running meter for 20'container. Steel floor container can take higher selective loads. If cargo exceeds these limits, a longer bedding is required or the cargo is to be loaded on flatracks.
