# **Dimensional standards for solar tiles**

## Overview

---

### What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.

### What size solar tiles do I Need?

ler and roo ates (if required) 300mm x 600mmMinimum 25mm space under batten y fall in the range 250 – 265mmNote that e tile covers two batten spaces. For 15 batten spaces/roof courses you will need 7.5 tiles – 7 tiles cover 612 widthPower OutputAs a guide our Solar Tiles output 155-180Wp/.

### What size solar tiles do I need for a slate roof?

250 – 265mmInline ArrangementGenerally\* when installing a patch of solar tiles within a slate roof the inline arrangement should be used for eas of installation – see picture. (It is possible to use the staggered arrangement, though it is a li.

### What are Solex solar tiles?

Version 5 – 06/12/2023OverviewSolex Solar Tiles offer an alternative to conventional solar panels for new roof applications. They use the same technology as modern solar panels – monocrystalline half cells – and pr uce electricity in the same way. The difference is that they form the actual roof cover

## Dimensional standards for solar tiles

### [Solar Tiles for Rooftop PV Market](#)

This forced manufacturers like Systovi to develop 9.6%-efficiency monocrystalline tiles meeting dimensional compliance, adding 18-22% to production costs compared to standard solar panels.
