

# **Doha Home Solar Power Generation System**

## Overview

---

How has Qatar improved its solar energy sector?

Since the launch of Al Kharsaah plant in 2022, with an initial capacity of 800 megawatts, Qatar rapidly enhanced its solar energy sector, doubling its capacity within just three years, which is a remarkable achievement in itself.

How to develop solar power in Qatar?

Currently, efforts have focused on developing solar capacity in the country through research centers, universities, utilities and pilot projects, and a number of institutions including Kahramaa, Qatar Foundation, QNFSP and QSTP are actively working on this front.

What is Qatar's largest solar power project?

Samsung C&T E&C Group has been awarded the contract for Qatar's largest solar power project, underscoring its growing leadership in renewable energy infrastructure. Commissioned by QatarEnergy, the 2,000MW Dukhan Solar Power Project represents the largest capacity solar facility ever undertaken by a Korean construction company.

How many solar panels does Qatar have?

Spanning 27□—equivalent to 3,790 football fields—the massive site will be fitted with 2.74 million solar panels. Upon completion in 2030, the plant will generate enough electricity to power approximately 750,000 households, even considering Qatar's high per-capita energy use.
