

EU Hydrogen Energy Refueling Station

Overview

What is the European hydrogen refuelling station availability system?

The European Hydrogen Refuelling Station Availability System provides a free, reliable, safe and ready to use data service on hydrogen refuelling stations in Europe.

Are hydrogen refueling stations required in the EU?

As a foundation for safe and compatible hydrogen refueling, the EU has already defined binding requirements for new or renewed hydrogen refueling stations in the Alternative Fuel Infrastructure Regulation (AFIR – REGULATION (EU) 2023/1804) since 13.04.2024:.

What is the hydrogen refuelling platform?

This platform is the only system providing live information regarding the availability of hydrogen refuelling stations across Europe for free. This service is key to ensure users are able to get the best digital services possible. Together we move fast towards zero emission mobility!”.

Are there public hydrogen refueling sites in Austria?

There were only four sites, in Graz, Asten, Innsbruck, and Vienna, but they represented the entire public-facing network. By late summer, OMV confirmed that Vienna’s Floridsdorf location had already closed, with the other three following in quick succession. That left Austria with no public hydrogen refueling options at all.
