What are earth leakage circuit breakers?

Earth Leakage Circuit Breakers are available in a selective range of sensitivity. This ensures that in the event of an earth fault downstream of the installation, only the defect part is switched off. Residual current devices (RCDs), like ground fault circuit interrupters (GFCIs), detect electrocution currents and cut power off immediately.

What are Earth leakages?

Earth leakages, also known as Residual Current Devices (RCDs) or Earth Leakage Circuit Breakers (ELCBs), are essential safety devices designed to prevent electric shocks and reduce the risk of electrical fires.
