

# Energy storage and battery swap station project approval

## Overview

---

How many battery swap stations will China build in 2025?

The two companies aim to build “no fewer” than 500 battery swap stations in 2025 alone, with a long-term goal of building out 10,000 stations to create a seamless “swap-as-fast-as-refuelling” experience for electric vehicle (EV) owners across China.

Are China's largest energy companies building a battery swap network?

Two of China’s largest energy companies have announced plans to build a nationwide battery swap network, with 500 stations to be built this year, on the way to building a total of 10,000.

How many battery swap stations are there in China?

“This year, the collaboration targets the construction of no fewer than 500 battery swap stations, with a long-term goal of 10,000 stations, creating a seamless “swap-as-fast-as-refueling” experience for electric vehicle (EV) owners in China,” the partners explained in a press statement.

How many Energy swapping stations are there?

The 10,000 new swapping stations will integrate with their ongoing work in various energy and advanced materials ventures. “The collaboration will build smart energy microgrids, featuring solar power, energy storage, charging, swapping, and battery inspection,” the partners explain. Meanwhile, Back In The USA.
