

# **Energy storage container intermediate paint**

## Overview

---

Are battery energy storage containers durable?

In the realm of offshore containers, durability and resistance to harsh environmental conditions are of utmost importance. This is particularly true for Battery Energy Storage System (BESS) containers, which house sensitive and costly equipment.

What is the C5 painting Standard by TLS offshore containers?

The implementation of the C5 Painting Standard by TLS Offshore Containers demonstrates their commitment to quality and durability. It is a testament to their understanding of the unique challenges presented by the offshore environment and their dedication to providing robust and reliable containerised solutions.

What is the difference between C5M and C5i painting standards?

The C5M standard is designed for offshore structures with high salinity, while C5I is for industrial structures with a high level of humidity and aggressive atmospheric conditions. The C5 Painting Standard is a comprehensive guide that outlines the necessary steps for achieving the desired level of corrosion protection.
