

Export of energy storage charging stations

Overview

Did Tesla export its first batch of energy-storage batteries to Australia?

SHANGHAI, March 21 (Xinhua) -- Tesla's new Megafactory in east China's Shanghai on Friday exported its first batch of Megapack energy-storage batteries, the company announced. It took the new Megafactory just over a month after its production launch to achieve its first export, with the batteries being transported from Shanghai Port to Australia.

Why did Tesla export a battery?

This export highlights Tesla's further expansion in the global energy storage market, and also underlines the extension of its battery technology from electric vehicles to energy storage, according to the company. "Megafactory gives us the ability to scale production and efficiency," said Mike Snyder, vice president of Tesla.

What is Tesla's new energy storage megafactory?

The energy storage Megafactory is the first of its kind built by Tesla outside the US and the company's second plant in Shanghai, began mass production just eight months after breaking ground, serving as a new example of "Tesla speed" in China, Tesla said in a press release sent to the Global Times earlier in February.

Did Tesla ship a Megapack energy storage system to Australia?
