# **Georgia Household Energy Storage Batteries**

## Overview

---

Will Georgia Power build a battery energy storage system?

Georgia Power has started construction on four battery energy storage systems across the state. The projects will add 765 megawatts of generating capacity, enough to power approximately 573,750 homes. Two facilities will be built near Air Force bases, one at a retired coal plant, and another will expand an existing facility.

How many battery energy storage sites will Georgia Power have in 2026?

Georgia Power has applied for certification of four battery energy storage sites totaling 500 MW expected to come online in 2026. In a continued effort to limit its use of fossil fuels to mitigate peaks, Georgia Power Company is adding a whole mess of new BESS.

What does battery mean according to Georgia law?

According to Georgia Code 16-5-23.1, battery is defined as making physical contact of a provoking or insulting nature against someone else, or intentionally causing visible bodily harm to the victim. A person commits battery under this law.

What's new at the mcgrau Ford battery facility in Cherokee County?

The fourth site will double the battery-storage capacity of the McGrau Ford Battery Facility being built in Cherokee County, with the first phase of that project having begun operations last fall. The PSC approved battery storage in April of last year as part a huge increase in generating capacity for Georgia Power.
