

**GETON CONTAINERS**

# **German backup solar container system**

## Overview

---

Why do people store solar power in Germany?

To date, most battery storage systems in the German electricity system have been used exclusively to optimize self-consumption. Consequently, an exponentially growing number of homeowners and companies store solar power for times when solar generation is low.

How many PV modules are in a solar container?

The innovative and mobile solar container contains 196 PV modules with a maximum nominal power rating of 130kWp, and can be extended with suitable energy storage systems. The lightweight, ecologically-friendly aluminium rail system guarantees a mobile solution with rapid availability. at full power.

What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest Panels lays flat on the ground.

How many battery storage systems are installed in Germany?

Battery Storage Boom: 1.2 Million Systems Installed Notably, battery storage systems, also essential for Germany's renewable energy transition, constitute a significant component of this ecosystem, with 1.2 million installed systems.

## German backup solar container system

### Solarcontainer: The mobile solar system

This system is realized through the unique combination of innovative and advanced container technology. Our pioneering and environmentally friendly solar systems: Folded solar panels in a container ...
