

GETON CONTAINERS

Grid-connected solar container energy storage system company

Overview

What is a grid-connected solar system with battery storage?

A grid-connected solar system with battery storage, stores the excess energy generated by a solar system for the home to use when the solar panels are not generating electricity from the sun e.g. at night. How it works; grid-connected solar systems with battery storage have solar panels that absorb the sun's rays.

What is a grid-connected solar system?

Typically, homes operate with a grid-connected solar system. This means that your home and solar power system are connected to the grid, allowing the house to access grid power during the evening while solar energy is used during the day as it is generated.

Why should you choose a solar storage container?

Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy. Lower energy/maintenance costs ensure operational savings.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.
