

High-voltage solar-powered container for airport use in Saudi Arabia

Overview

What is Saudi Arabia doing with solar power?

One of its major achievements has been the establishment of 3.5MW PV project at the King Abdullah Petroleum Studies and Research Center. Saudi Arabia's first competitive global tender for utility-scale solar power projects was recently launched – two 50 MW solar power plants at Al-Jouf and Rafha.

Is concentrated solar power a viable option for Saudi Arabia?

In addition to solar PV, concentrated solar power (CSP) is an interesting option for Saudi Arabia due to its strong dependence on desalination plants to meet its water requirement. Waste heat of a CSP plant can be used to power seawater desalination projects.

Does Canva Saudi Arabia have solar power?

Credit: Canva Saudi Arabia has been making remarkable strides in renewable energy, with a significant focus on solar power as part of its Vision 2030 initiative. The Kingdom aims to generate 50% of its electricity from renewable sources by the end of the decade, with solar energy leading the charge.

What are the biggest solar projects in Saudi Arabia?

Among the most prominent projects is the Sudair Solar PV Plant, which recently reached an operational capacity of 1,125 MW, with an ultimate goal of 1,500 MW. It stands as one of the largest single-contracted solar plants in the world and the largest in Saudi Arabia.
