

Home battery storage for sale in New-Zealand

Overview

Why is battery storage important in New Zealand?

Battery storage, from household to utility-scale batteries and within electric vehicles, is a game changer in the energy transition. Solar penetration is still low in New Zealand but it is growing quickly and if we want to make the most of it we need to capture and store it to be used when the sun isn't shining and when demand is at its highest.

How much does a home battery cost in New Zealand?

Battery prices are coming down, but the upfront cost is still significant. On average, home batteries in New Zealand range from \$800 to \$1,200 per kilowatt-hour (kWh) of storage, depending on the brand and installation requirements.

Are batteries safe in New Zealand?

Yes. New Zealand has strict standards that apply to batteries including the location and installation. If these are followed, the risk of fires is very low. Can batteries be recycled?

Yes! 95% of a lithium battery has the potential to be recycled and second life battery manufacturing is occurring in New Zealand.

How much does a battery storage system cost?

LG's battery storage systems come with a 10-year warranty. Sizes Available: 6.5, 9.8, 13.1kWh Price Estimate: Approx \$9000-\$15,000 depending on size, installation extra Hybrid battery models are great for seamlessly integrating a battery into either a new or existing solar panel system.
