# How many 5G base stations are there in Minsk

Overview

Does MTS Belarus have a 4G network?

MTS Belarus said its LTE-800 network covers 'thousands of settlements' across Belarus. Previously, it was launched in Vitebsk, Gomel, Mogilev and Minsk regions. In fiscal 2022, it plans to provide dense 4G coverage to the western regions of the country – e.g. the Brest and Grodno regions.

What is a 5G base station?

They help fill coverage gaps, improve network reliability, and handle high data traffic. In cities, more than 60% of 5G base stations are small cells, placed on rooftops, lampposts, and building facades. These mini base stations are crucial for delivering consistent 5G speeds in crowded areas like stadiums, shopping malls, and business districts.

How many 5G base stations are there in China?

In data collected between July 2022 and June 2024, China was reported to have had around 3.5 million 5G base stations installed across the country, with Chinese mobile operators investing heavily in 5G infrastructure. By comparison, the European Union had around 460,000 thousand base stations, while the United States had approximately 175,000.

Is Belarus launching a 5G test zone?

TeleGeography's GlobalComms Database writes that in June last year, Belarus' national infrastructure operator Belarusian Cloud Technologies (beCloud) announced the ramping up of its 5G test zones in the country, as it entered the second stage of widescale testing ahead of the commercial launch of the technology.
