

# How many air energy storage power stations are there in Moldova

## Overview

---

What type of energy is used in Moldova?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important energy source in lower-income settings. Moldova: How much of the country's energy comes from nuclear power?

.

Does Moldova have an electricity power system?

Moldova's electricity power system operates in parallel with Ukraine's (the Integrated Power System / Unified Power System of Russia grid), but it cannot currently operate in parallel with Romania's network, which is part of ENTSO-E. Only small quantities of electricity can be exchanged between the two systems through an island-mode operation.

Does Moldova have gas storage facilities?

Moldova currently does not have operational gas storage facilities. However, the government is considering two possible sites for geological storage in the Zagarancea-Mânzesti-Unghenii de Jos villages area and in the Cantemir district. No concrete decisions have been taken on these developments.

How many MW of wind and solar energy is installed in Moldova?

, deployment of wind and solar energy in Moldova has been very slow. As of 2022, only 97.9 MW of renewable capacity for electricity generation was installed. Figure 1. Installed electricity generation capacity by type. 13% Non-renewable: 441.4 MW / 79% Renewable Energy Potential The Republic of Moldova features great potential
