

# **How many energy storage power stations are there in Jordan**

## Overview

---

How many power plants are in Jordan?

Jordan has 33 utility-scale power plants in operation, with a total capacity of 4703.5 MW. This data is a derivative set of data gathered by source mentioned below. Data and information about power plants in Jordan plotted on an interactive map.

What is the largest power station in Jordan?

The Aqaba Thermal Power Station is the largest power station in Jordan, with a total generation capacity of 656 MW. It consists of five steam turbines units (5 x 130 MW) and two hydraulic turbines (2 x 3 MW). The power station is fueled by natural gas and fuel oil.

What type of energy is used in Jordan?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important energy source in lower-income settings. Jordan: How much of the country's energy comes from nuclear power?

.

Is biomass a source of electricity in Jordan?

Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important source in lower-income settings. Jordan: How much of the country's electricity comes from nuclear power?

Nuclear power – alongside renewables – is a low-carbon source of electricity.
