How much does 2200 watts of solar energy cost

Overview

How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's "cost per watt" is a little like the "price per square foot" when you buy a house. It helps compare the value of solar energy systems in different sizes.

How much do commercial solar panels cost?

Generally, installing solar panels on businesses costs a bit less per watt because the systems are larger, but the total costs will be higher. In 2025, the average cost for commercial solar panels is just about \$2.00 per watt. There is a lot to consider when figuring out how much you'll spend on a solar installation.

Why do solar panels cost more than a Watt?

For instance, commercial installations or large residential systems can negotiate better pricing due to the volume of panels purchased. Conversely, smaller installations may face higher costs per watt because the fixed costs associated with installation, such as labor and permitting, are spread over fewer panels.

How much does a 5500 watt solar system cost?

For example, the PPW of a 5,500 Watt system looks quite different before and after accounting for the 30% tax credit. According to the Solar Energy Industries Association, the average price per watt for residential solar projects was \$3.27 in the first half of 2023.
