# How much does a mobile factory solar container battery BESS cost

## Overview

---

How much does a battery energy storage system cost?

When evaluating battery energy storage system (BESS) prices per MWh, think of it like buying a high-performance electric vehicle – the battery pack is just the starting point. Industry data reveals current BESS project costs range between \$280,000 to \$480,000 per MWh installed, depending on configuration and ancillary components.

How much does a Bess system cost?

As of most recent estimates, the cost of a BESS by MW is between \$200,000 and \$450,000, varying by location, system size, and market conditions. This translates to around \$200 - \$450 per kWh, though in some markets, prices have dropped as low as \$150 per kWh. Key Factors Influencing BESS Prices.

How much does a battery project cost?

Developer premiums and development expenses - depending on the project's attractiveness, these can range from £50k/MW to £100k/MW. Financing and transaction costs - at current interest rates, these can be around 20% of total project costs. 68% of battery project costs range between £400k/MW and £700k/MW.

How much will a battery cost in 2030?

Lower Battery Pack Costs: Battery costs can fall to \$50-60/kWh by 2030, accompanied by the corresponding reduction in BESS capital costs. Market Maturity & Competition: Higher numbers of manufacturers in the market will drive down costs.
