

# **How much does the energy storage equipment box in Port Moresby cost**

## Overview

---

How much does Port Moresby power station cost?

The Project is designed to be capable of staged expansion to approximately 175 MW with the cost for the initial 58 MW plant being ~US\$100 million. This investment is underpinned by a long term Power Purchase Agreement (PPA) with PNG Power Limited. The Port Moresby Power Station during construction in October 2018.

How much does a battery energy storage system cost?

In 2025, the typical cost of commercial lithium battery energy storage systems, including the battery, battery management system (BMS), inverter (PCS), and installation, ranges from \$280 to \$580 per kWh. Larger systems (100 kWh or more) can cost between \$180 to \$300 per kWh. How does battery chemistry affect the cost of energy storage systems?

.

How much does a commercial lithium battery energy storage system cost?

In 2025, the typical cost of a commercial lithium battery energy storage system, which includes the battery, battery management system (BMS), inverter (PCS), and installation, is in the following range: \$280 - \$580 per kWh (installed cost), though of course this will vary from region to region depending on economic levels.

Should you invest in a commercial battery storage system?

Investing in commercial battery storage systems now offers benefits such as shorter payback periods, energy independence, reduced peak power costs, and achieving sustainability or carbon neutrality goals faster. Additionally, government incentives make systems more affordable.
