

# **Huawei Energy Storage Charging Pile in Rotterdam the Netherlands**

## Overview

---

Why is battery storage important for the Dutch electricity system?

This will provide more flexibility for the Dutch electricity system when the battery is put into operation in 2027. Battery storage enables electricity to be stored when there is more available than is needed, for example when a lot of solar and wind energy is generated.

Why is flexible battery storage becoming more popular in the Netherlands?

Roger Miesen, CEO RWE Generation and Country Chair for the Netherlands: “With the increasing share of renewable energies in the electricity mix, the demand for flexible battery storage is also rising.

How many battery racks will RWE install in Eemshaven?

The company has now finalised its investment decision for a Dutch battery storage project with an installed power capacity of 35 megawatts (MW) and a storage capacity of 41 megawatt-hours (MWh). A total of 110 lithium-ion battery racks are to be installed at RWE’s biomass plant in Eemshaven on an area of around 3,000 square metres.

Who is responsible for battery development in the Netherlands?

Enecogen is responsible for maintenance and operations. The EP NL and Eneco trading departments control the battery. Batteries are indispensable and acceleration is necessary. Batteries are indispensable for the energy transition. Yet the development of battery projects in the Netherlands lags behind that in other countries.
