

India Mumbai Base Station solar container battery System

Overview

Will Tata Power install a 100 MW battery energy storage system in Mumbai?

Mumbai, 7th April, 2025 – Tata Power, India's largest integrated power company and a trusted electricity provider to approx. 8 lakh residential and commercial consumers, has received approval from the Maharashtra Electricity Regulatory Commission (MERC) to install a 100 MW Battery Energy Storage System (BESS) in Mumbai over the next two years.

Are battery energy storage systems right for India?

But India's evolving electricity landscape has created an environment where battery energy storage systems (BESS) can earn strong returns from power exchanges, while offering critical system-level support to the grid. Batteries are increasingly recognised as the multitool of the power sector transition.

Where will Tata Power install a 100 MW power system?

The entire 100 MW system will be installed across ten strategically located sites, especially near load centres across Mumbai Distribution, centrally monitored and controlled from Tata Power's Power System Control Center.

What role do batteries play in India's power sector?

This is the first report in a two-part series exploring the growing role of batteries in India's power sector. Part 1 – Batteries for power markets examines merchant battery models – where batteries operate without fixed contracts, participating in wholesale day-ahead markets and delivering essential grid services.
