

**GETON CONTAINERS**

# **India solar container battery Project**

## Overview

---

Why is battery storage a growing trend in India?

By Debmalya Sen, President, India Energy Storage Alliance The global rise of battery storage has often been associated with the uptake of hybrid solar projects incorporating battery components.

How much battery energy storage capacity is available in India?

Between 2022 and May 2025, India auctioned approximately 12.8GWh of battery energy storage system (BESS) capacity for both hybrid and standalone applications. However, only about 219MWh of BESS capacity is reported to be operational, leaving a large pipeline of projects under construction.

What is the largest solar project coupled with battery storage?

At present, the largest solar project coupled with battery storage is California's Edwards & Sanborn project, comprising 875 MW of solar capacity with a 3.3 GWh battery energy storage system (BESS).

How solar PV & Bess development has impacted India's battery storage journey?

Graph 1 shows the journey of solar PV plus BESS development in India, highlighting why 2024 has witnessed a rise of this combination of technologies in India's battery storage journey. The use cases for such tenders have been peak management, diesel generator offset and overall renewable energy integration.
