

# Inverter installed power

## Overview

---

What is a power inverter?

A power inverter is a device that converts DC power from a normal household battery, car battery or solar battery to AC power that can be used to run appliances and other devices. The wattage of a power inverter determines how much power it can deliver.

Where to install an RV inverter?

The next step in your RV inverter installation is to find the ideal place for your power inverter. The ideal places is: Many people install their power inverter in the cargo hold, but every camper's layout is different. Remember to keep safety in mind when deciding where to install an RV inverter.

Do I need an electrician to install an inverter?

Inverters produce 230V which can be highly dangerous if not fitted properly, if you are new to electrics or aren't very comfortable with what to do we would advise you to get an electrician to do your installation. We will explain the setup of an inverter system to power some sockets, this allows you to plug in appliances just like you do at home.
